

SpeedCove[®]

Precast Cove Base Systems

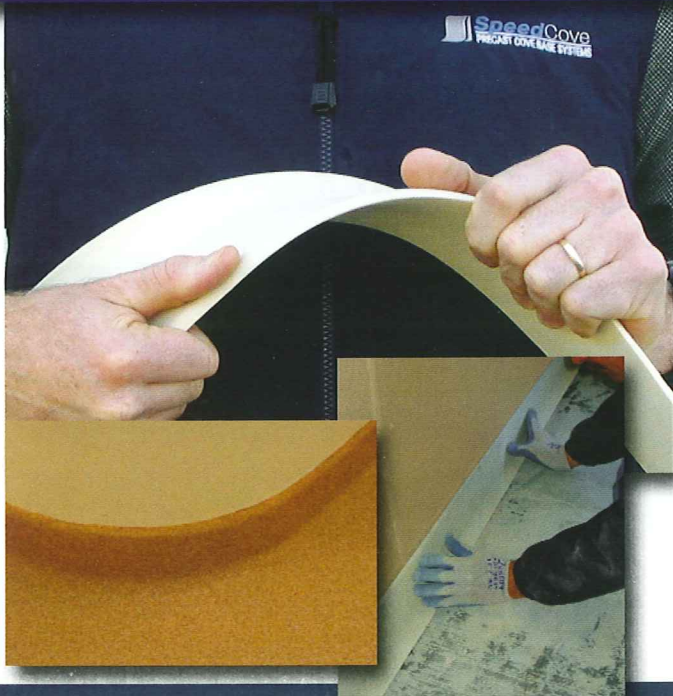

for epoxy & decorative flooring professionals

PATENT PENDING

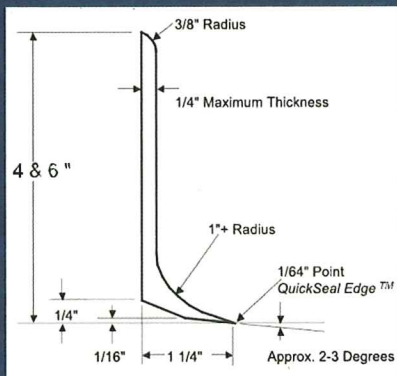

new & improved • lightweight flexible • impact resistant

- Made from an exclusive lightweight, flexible polymer composite
- 3x faster to install; 3x lighter to ship & handle
- Used with all types of finishes & applications, including: epoxy, decorative, & build-up flooring
- Meets Environmental Health Department code requirements
- Approved by Health Dept., US Forest Service, FDA, & others
- 4" & 6" high straight pieces w/ matching 90° corners
- Installs with basic carpentry tools & skills
- Just as quick under cabinet toe kicks & around curved walls
- Can be tacked in place w/ finish nailer until adhesive cures
- Complete overnight & rush jobs faster & more profitably
- Additional sizes & shapes are being proposed for 2008

engineered for a new cove standard

- Consistent, uniform 1" cove radius makes finished floors look absolutely beautiful, easy to clean and the rounded top edge eliminates a dirt shelf
- **QuickSeal Edge™** is angled down to transition smoothly... forms a positive seal... eliminates most patching... and adjusts slightly for uneven floors
- Polymer composite provides "monolithic" integration w/ cove base & coatings
- Creates a seamless, water & chemical proof connection between floors & walls
- Meets highest code standards for both foreign & domestic
- 10" long pre-formed 90° corners eliminate slow & inconsistent manually made corners, plus joint patching is done out in the flat section for speed & ease
- Flexible polymer composite allows cove base to follow general bends in wall & floor, without showing imperfections
- Base portion is 1/4" thick, installs flush with tile walls and FRP termination channels
- Relief 1/4" cut in lower back allows a tight fit in un-square corners

fast installs • quicker turnover • more profits

- NEW & IMPROVED 2nd Generation is a lightweight, flexible polymer composite
- 3x faster, 3x lighter, & impact resistant
- Used with all types of flooring finishes & applications
- Makes epoxy, decorative, & build-up finishes look & perform their best
- Meets & exceeds Environmental Health Department requirements
- For commercial, industrial, residential, new & repair projects
- Installs using basic carpentry skills & tools
