# Slip Stop

Slip Resistant Additive

## P R O D U C T D A T A

### DESCRIPTION

ChemMasters' **Slip Stop**, Slip-Resistant Additive, is a micronized polymer that imparts a slip resistant texture and reduces gloss when used with ChemMasters' coatings. **Slip Stop**, slip resistant additive, has low oil absorption and high solvent resistance that allows high solubility with **PolySeal, PolySeal A, Traz 25, Traz 25A, Crystal Clear, Crystal Clear A**, and other acrylic sealers with minimal effect on viscosity. **Slip Stop** is not for use with water based materials.

### USES:

- May be added to coatings such as paints and sealers
- Add to **PolySeal, PolySeal A, Traz 25, Traz 25A, Crystal Clear, Crystal Clear A**, or other solvent based acrylic sealers.
- Add to **Duraguard 310 CRU**.
- Apply to pool deck and patio surfaces to provide a slip resistant feel under foot.

### ADVANTAGES:

- Provides slip resistance surfaces.
- Easy addition with coatings such as paints and stains.
- Good chemical and abrasion resistance.
- Good universal compatibility without effecting viscosity.

### MIXING

Add 1 lb (454 g) of **Slip Stop**, slip resistant additive, per five gallons (18.9L) of ChemMasters' acrylic solvent based sealers. The actual amount of **Slip Stop** used may be adjusted to achieve the desired custom surface.

Packaging	
12 lb (5.4 kg) pail	F6523.05
12 x1 lb (12 x 454 g)	F6523.12
1 lb (454 g) jar	F6523.QT

### LIMITATIONS

- **Slip Stop**, slip resistant additive, will increase the coefficient of friction of coated surfaces reducing the tendency to slip.
- **Due to the small particle size of Slip Stop the surface will be slip resistant but not non-skid.**
- Not for use in sprayers.
- Not for use on wood.
- Not for use in water based sealers.

### CAUTION

**Slip Stop**, slip resistant additive, is not hazardous and does not contain silica, although, the dust should be treated as a nuisance dust while mixing. Applying a small test batch is recommended to test for desired finish.
